Rich,

Have not heard from you in a while, hope everything is going well. Did you ever go on that geology trip in September/October that I mentioned? They usually have interesting sites and interesting characters.

We are trying to gather QW and well data for Pennsylvania that is electronically stored (i.e. Excel spreadsheet). You collected a lot of data from the Dimock area of which you gave me some for my review. We have accessed legacy STORET and modern STORET, but do you have more water-quality and well data for Dimock and other areas in the state that we can gather and combine with existing data?

Take care.
